3	Business Analyst & Product Owner
4	Quality Assurance
5	Project Manager
6	Product Manager
7	Portfolio Manager

Our Process

PROJECT APPROACH

Consulting

- Study business concept
- Provide recommendations to business model from technological point of view
- Consult to select the suitable solution
- Provide implementation roadmap

UX/UI Design

- Conduct discovery workshops to understand and analyze business requirements
- Provide information architecture and flow
- UX design
- UI design
- User testing (not mandatory)
- UI/UX iteration: customers can feedback on the design for every 2 weeks

Execution & Development

- Develop with Agile methodology
- Use latest technology, best suit for the project
- Full-stack development: backend and frontend
- Mobile centric: mobile application is the current trend and future
- Conduct UAT closely with customers
- Do data migration

Final Product

- A custom product which is tailor-made to the need of business, enhance and grow together with business.
- A flexible product, easy to connect, inherit and improve.

MAINTENANCE & HOSTING

Maintenance

- After going live, we will provide 30 days go-live support
- Upon completion, we will provide 5 days of free maintenance for 6 months
- Any additional efforts will be estimated and charged based on man-day fee basis

Hosting

- Team also provides hosting service
- If clients want to handle by themselves, Team will provide detailed specifications for deployment along with some recommendations

Technology stack

APPLICATION	TECHNOLOGY
Web development	NEXT.js ReactJs
API and back-end	node JS nest python SWAGGER
Source code control	GitLab
Deployment & orchestration	docker kubernetes HELM RANCHER
Source code scan	sonarqube
Vulnerability scan	aqua trivy Semgrep
Database	PostgreSQL elasticsearch redis

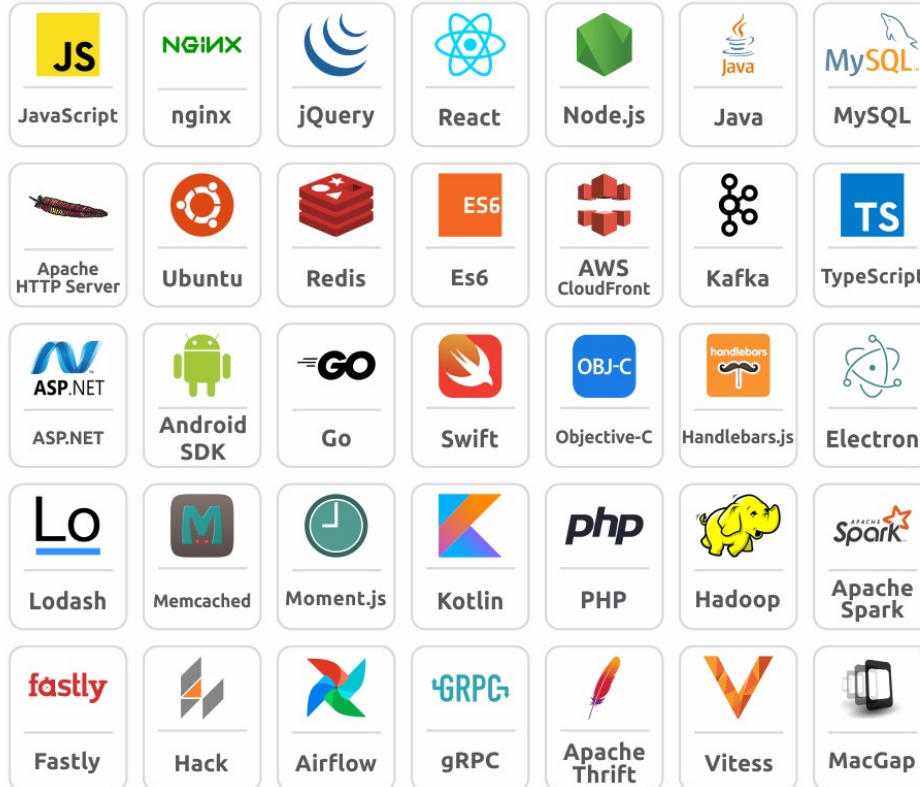

Technology stack

APPLICATION	TECHNOLOGY
Infrastructure	 amazon web services  Azure  Google Cloud
Monitoring & tracing	 elastic apm  Prometheus   Grafana
Data analysis	  Grafana  re dash
Gateway/Load balance	 NGINX  ingress
Message broker	 NATS  KeyCloak
Geolocation	 Google Maps
Authentication	 Firebase

Technology stack

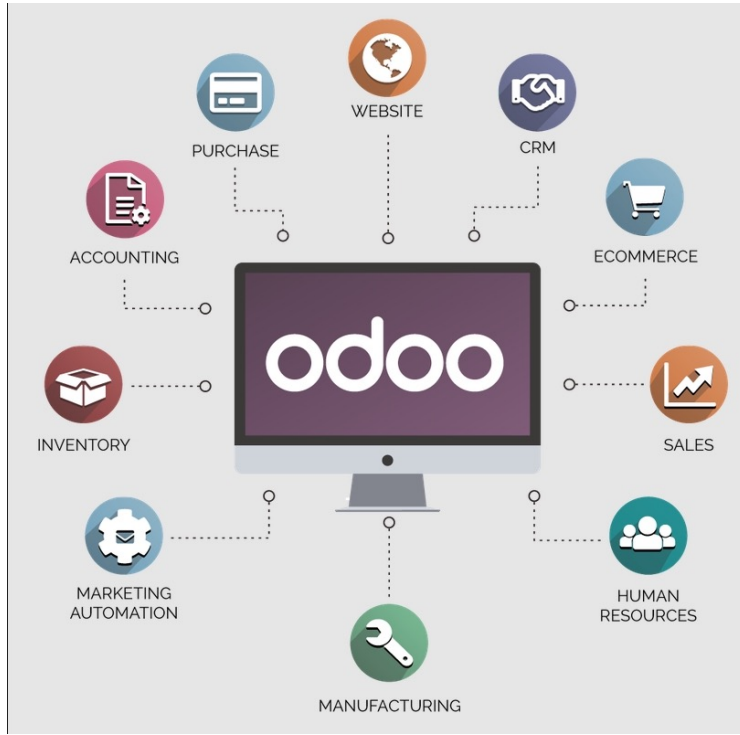

And more than
that ...

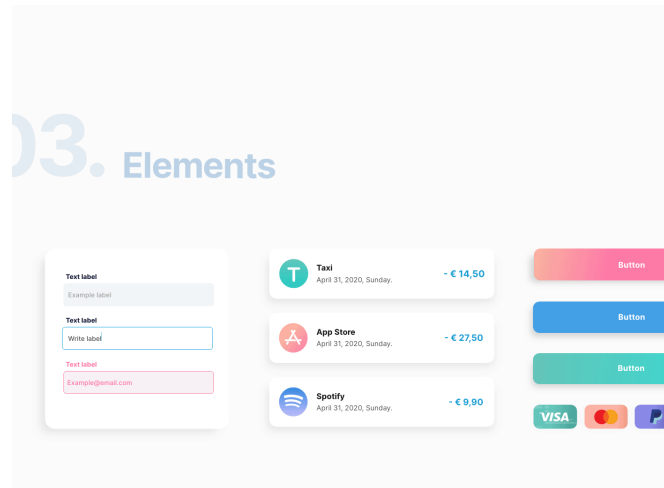

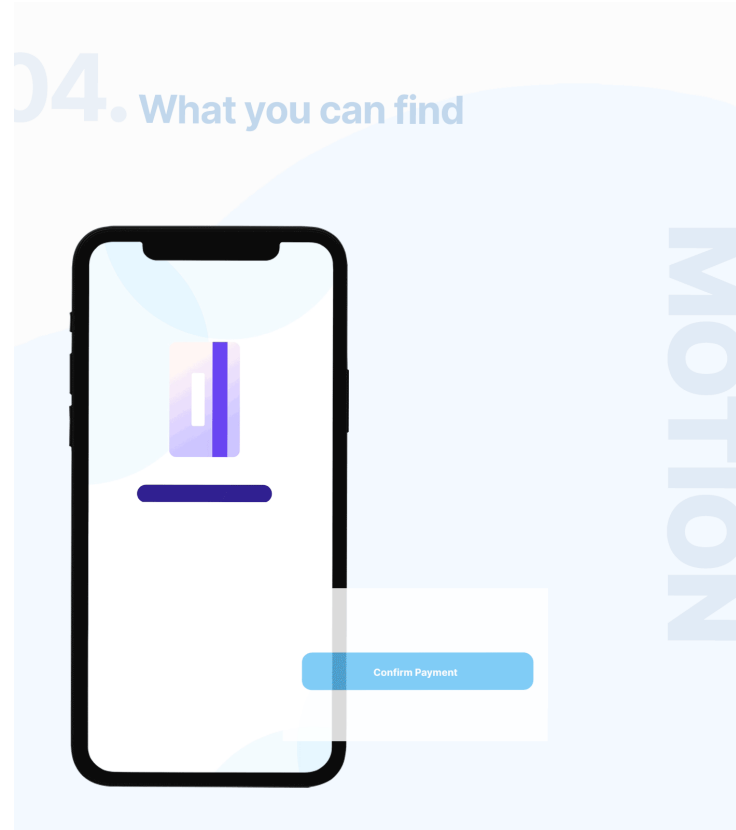

Other Framework

In addition to developing custom software from scratch, we also have the capability to build on top of existing frameworks like Odoo and Zoho. For small projects, we recommend using these pre-built frameworks to optimize costs.
